

To build your first school website, you can use the complete, ready-to-run **single-file HTML code** provided below. It includes the structural HTML markup along with built-in CSS styling to format your layout, navigation bar, hero sections, and responsiveness for mobile screens. [1, 2]

Complete HTML & CSS Code

Copy the exact code block below, paste it into a plain text file like **Notepad** (Windows) or **TextEdit** (Mac set to plain text), and save the file with the exact name **index.html**. [3, 4]

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">

© 2026 Apex International School. All Rights Reserved.

Steps to Customize and Open Your Website

1. ****Change the text****: Replace `"Apex International School"` and the placeholder paragraphs with your real school name and actual information.

2. ****Add your school photo****: Locate line 113 in the code: ``. Replace that placeholder link with the exact file path of your local image (e.g., `src="school-photo.jpg"`). Keep your image file inside the same folder as your `index.html` file.

3. ****Run it****: Double-click your saved `index.html` file to instantly open and view your new website locally in Google Chrome, Microsoft Edge, or Safari.

To help tailor this design further, tell me:

* Do you have ****specific primary school brand colors**** (like dark navy blue, forest green, or maroon) you would like me to implement?

* Would you like me to add an extra ****admissions form**** or a ****school event notice board**** section?
